

Hangman Documentation

Basic Rules

This game requires at least two people but can be played with more. One person enters a word and the other player(s) have to guess that word a letter at a time. When a correct letter is guessed, the letter(s) in the word is shown.

When the letter chosen is incorrect, part of the hangman is drawn. The game is won when the word is guessed and is lost when the hangman has been drawn completely.

Playing The Game

On the first page of the game, you chose a word for the other player(s) to guess and a difficulty. The word must be at least three letters long.

Enter A Word:

.....

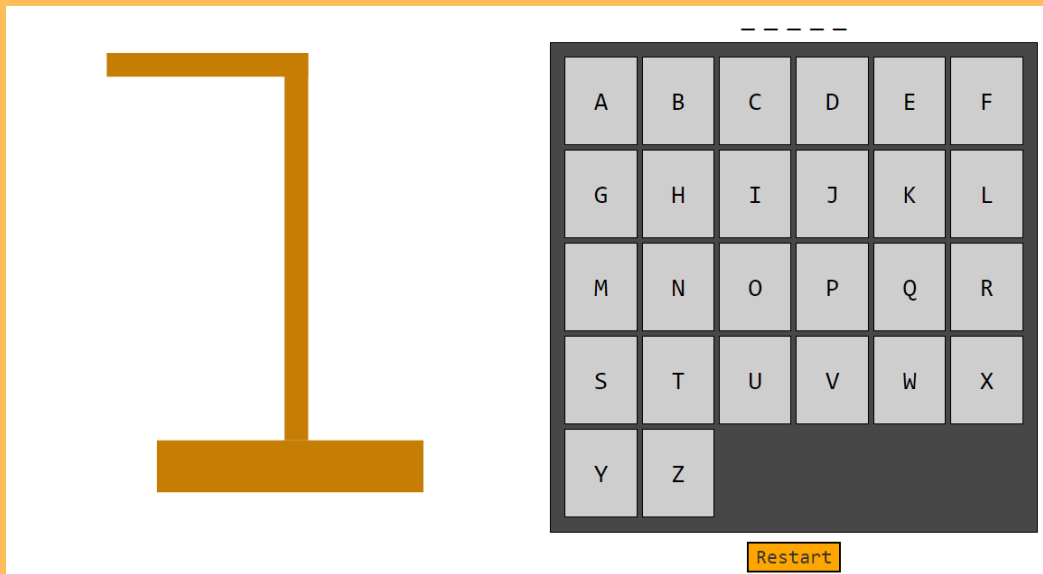

Select The Difficulty:

Five Guesses ▼

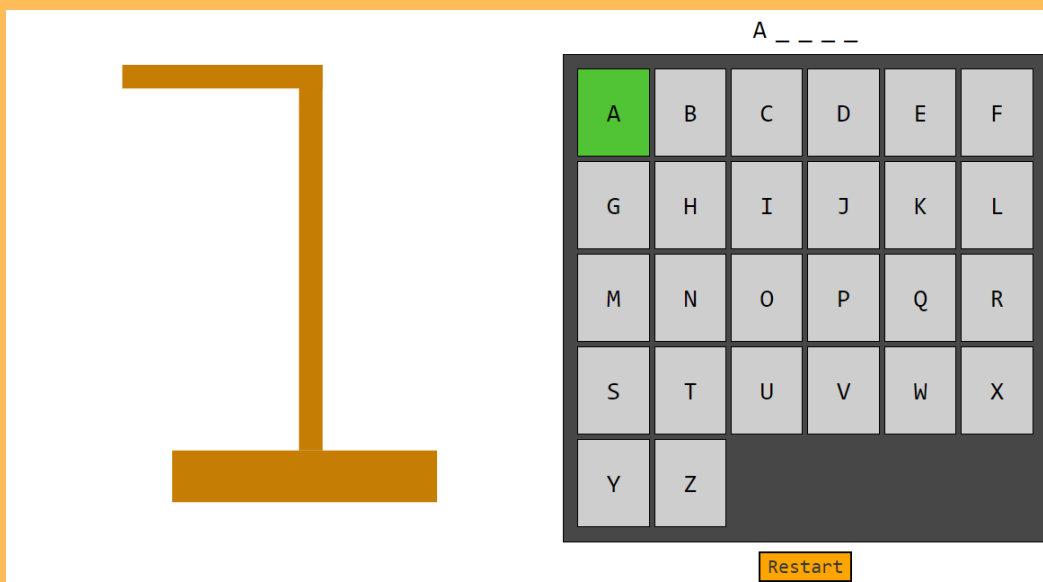

Start Game

It will automatically hide the word you have typed to prevent the other player(s) from seeing the word

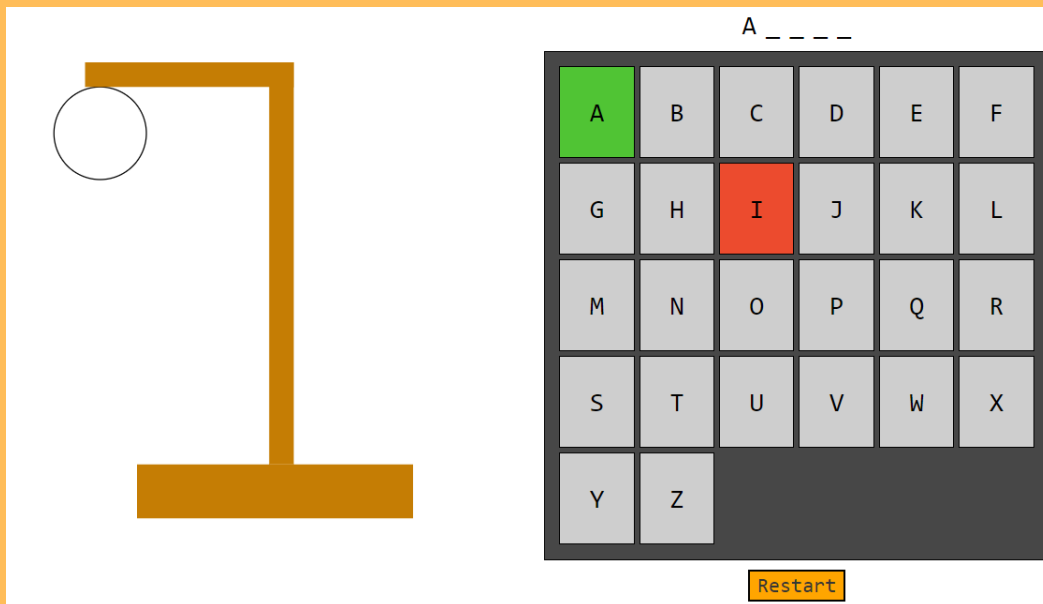

When the word is entered and the difficulty is selected, the game should look like this.

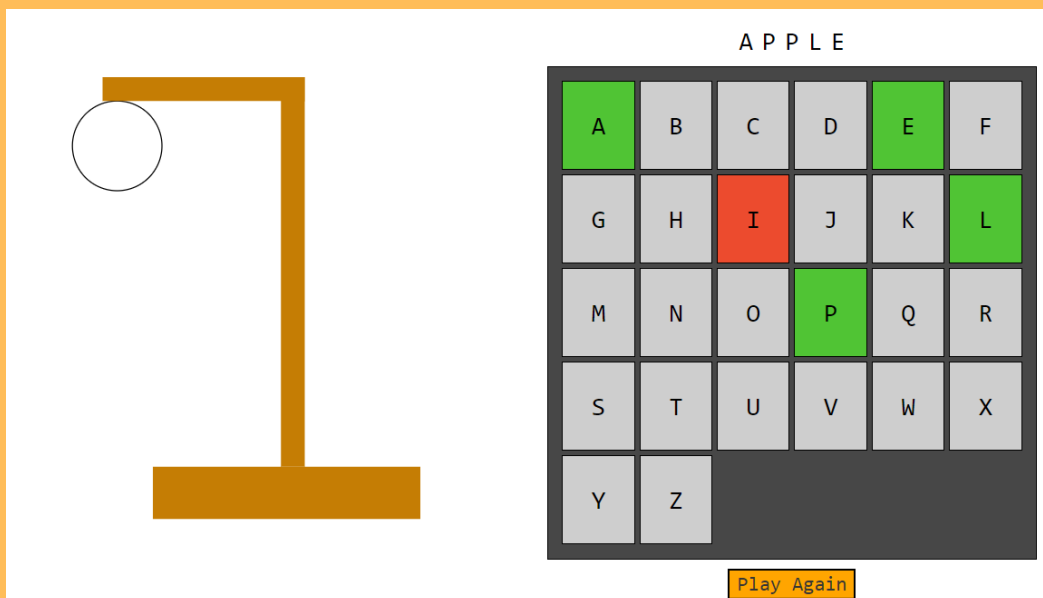

The player who is guessing the word will press a letter on the alphabet provided. If the letter selected is correct, the letter will turn green and will be displayed above.

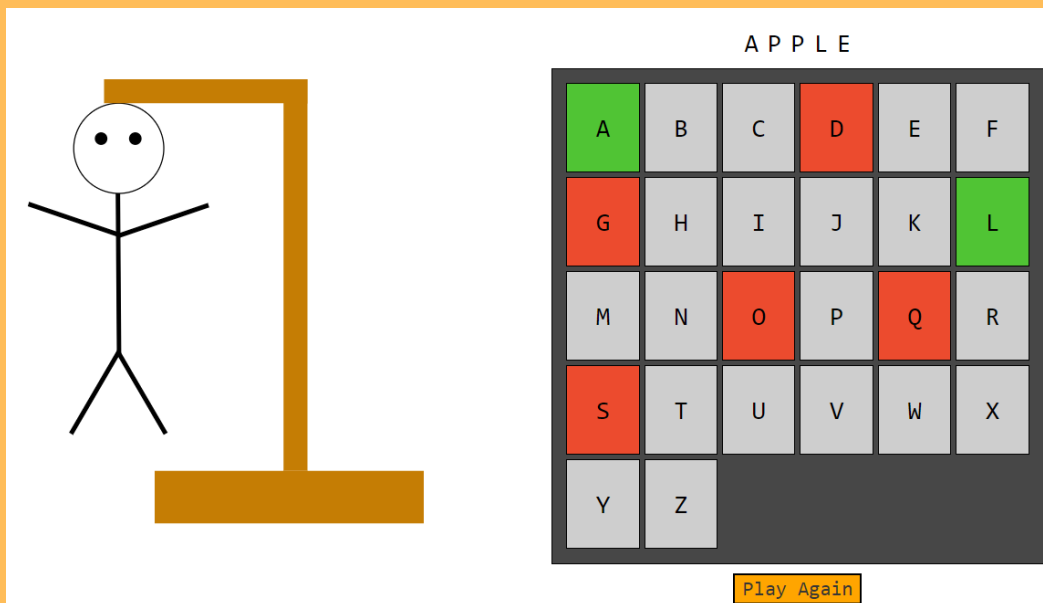

When the letter guessed is incorrect, the letter will turn red and part of the hangman will be drawn.

The player guessing wins when they guess all of the letters in the word.

The player guessing loses when they run out of guesses and the hangman is drawn. Upon losing, the word is revealed and you are given the ability to replay with a different word as well as change the difficulty.

This game is simple to play and understand while still being fun.
